Manufacturing Excellence Since 1857

Adlake: Your Comprehensive Solutions Provider!

OUR SERVICES AND CAPABILITIES: Meeting Your Unique Needs

At Adlake, we take pride in our broad range of services and capabilities, catering to a variety of industries and customer types. With a steadfast commitment to excellence, our experienced team ensures on-time delivery of flawless products. We specialize in both custom and semi-custom offerings, allowing you to have complete control over the design, materials, fabrics, and finishes. By handling every aspect of development and production in-house, we guarantee that the end product is precisely tailored to your needs.

MACHINING: Precision at its Finest

Equipped with state-of-the-art machining technology, including precision CNC and Lathe capabilities, our machining department delivers outstanding results. Additionally, we offer manual machining services, providing versatility to accommodate various project requirements.

FOUNDRY AND FINISHING: Crafting Perfection

Our facility boasts a Non-Ferrous Sand Casting Foundry, specializing in Aluminum, Bronze, Nickel, and Brass. With automatic core making capabilities, we streamline the production process from prototyping to large-scale manufacturing. The Finishing Department within our Foundry provides an array of finishing options, including Wheelabrator, Hand Polishing, Vonnegut, Plating (zinc, brass, nickel, chrome), Anodizing, Primer, and Paint. Rest assured, your products will receive meticulous attention to detail.

SEWING AND ASSEMBLY: Tailored Craftsmanship

With our Industrial Sewing Department, we handle various materials, from cloth to vinyl to rubber.

We work closely with customers to meet specific Fire, Smoke, and Toxicity Testing requirements. With over 150 years of experience, we have been manufacturing curtains, shades, and visors for the transportation industry. Our skilled craftsmen also offer assembly services for metal, vinyl, rubber, wood, plastic, and glass, providing comprehensive solutions for your assembly needs.

ENGINEERING & PROTOTYPING: Transforming Ideas into Reality

Our dedicated team collaborates closely with you, from concept to prototype to production. With extensive experience and expertise, we assist in implementing your designs, ensuring successful project outcomes.

PRESS ROOM: Forming Excellence

For your shearing, punch press, draw press, stamping, and press brake needs, our Press Room offers efficient solutions. With a variety of sizes and tonnage, we can handle nearly any forming project, delivering superior results.

WELDING: Seamless Connections

Adlake provides Mig/Tig and Spot Welding services, ensuring strong and reliable connections for your products.

SPECIALIZED SERVICES: Going Above and Beyond

In addition to our core capabilities, we offer a range of specialized services, including Product and Solution Management, Repair and Refurbish Services, Waterjet Cutting, and Laser Cutting.

Contact us, our dedicated team will provide exceptional service and deliver the comprehensive solutions you deserve.
